3. Please describe any problems or limitations which you feel hindered the course's success:

- My only suggestion is having printed out material, online access was good but made note taking more difficult
- None, if anything not enough time
- Strong bias
- I would've loved more time

4. Additional comments:

- Extremely knowledgeable about so many areas. Enjoyed what could have been a very "dry" topic.
- Group and session were very informative.
- I learned a lot about the difference between legalization and discrimination.
- I really loved this whole class. Frank kept me hype and interested the whole time. I am really interested in policy and I want more info/knowledge/experience.
- I think this speaker was the best over the 4 days. He kept my attention and I learned the most.
- Informative, engaging, and thought provoking
- Needs less bias; more information and studies supporting the opposing argument
- Phenomenal course. Informative, interesting, well worth my time.
- The instructor was very knowledgeable and passionate about the subject matter, and offered some interesting insights and behaviors that showed creativity and sense of humor. However, the style of presentation appeared to be problematic at times and therefore less effective (talking very fast, language peppered with curse words, holding onto the wooden yard stick).
